	Call dispositions To configure the call dispositions for this company, perform the following anyor in the admin area of your Talaback account.	
	1. Create a may proop for the company, or rease one from other company, in case you want to have the same depeations for both companys. 2. Create or rease a disposition set for thering proop, with call detailors "Authound".	
	3. Assign the sing group to all the agents working in this campaign.	

### The challenge.

Your customer wants effortless customer service. They expect you to engage with them proactively over voice and digital channels. Proactive engagement also reduces cost by deflecting incoming call volume. But manual outbound calling is highly inefficient, with agents having to deal with a high percentage of unproductive outcomes. Getting through to a live "hello" is time-consuming and costly.

### How Talkdesk solves it.

Talkdesk Proactive Outbound Engagement<sup>™</sup> is a suite of outbound voice and digital capabilities built on the Talkdesk CX Cloud<sup>™</sup> contact center platform. It includes dialing modes for every scenario, including:

- Talkdesk Preview Dialer provides an automated dialer with preview dialing for customer experience centric outreach.
- Talkdesk Dialer offers, predictive and preview dialer suitable for customer service-oriented outbound engagements.
- Advanced Dialer, in partnership with Noetica, delivers predictive, power, progressive, preview, and agentless dialing modes, plus a patented Al-driven answering machine detection algorithm.
- Talkdesk Dialer for Salesforce, streamlines systems and offers preview and power dialing embedded within Salesforce.
- Automated Notifications, empowers event-driven proactive SMS notifications.

Predictive dialing provides high-volume calling, screening out non-productive results and only passing live connections to agents. Preview and Power dialing offer less aggressive dialing, with the benefit of higher quality interactions - ideal for high-value customer engagements.

### The Talkdesk difference.

Fast and easy to set up and run campaigns by non-technical staff, with Talkdesk "enterprise power, consumer simplicity" design philosophy. No technical staff required.

**Realize significant cost savings** combined with the simplicity of managing everything on a single platform that offers a "single pane of glass" for agents.

Outbound options for every scenario depending on your outbound goals. Predictive, Power, and Preview dialing modes, plus proactive SMS notifications give you ultimate flexibility in your engagement strategy.

Gain a holistic view of all voice interactions, inbound and outbound, with unified reporting, and effortlessly manage all users, numbers, and devices from a unified interface.

### **Business value.**

Increase connect rates by 30-300%

### How it's done.

#### Advanced dialing strategies

Maximize contact rates with campaign management, targeting, and segmentation.

#### Easy list management

Outbound

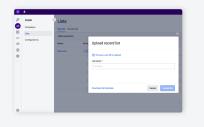

per hour

Increase outbound agent

minutes to 50+ minutes

productive time from 10-12

Call lists and DNC lists can be uploaded via CSV file or via API from your favorite CRM system.

## Boost

Boost revenue per agent by 30-300%

#### Holistic reporting

Track campaign performance and adjust on the fly with unified dashboards and reporting.

### Use cases across industries.

	Challenges	Solution
Banking	Banks need to connect with clients on past due credit card and loan balances, before they become delinquent. But manual calling is inefficient.	Improve outbo rates so early teams can do while maintain experience.
Insurance	Insurers are inundated with routine inquiries, such as claim status updates, and yet also need to address more complex interactions with a human touch.	Minimize call and inquiries customers inf claims status SMS notificat employees to complicated i

mprove outbound connect rates so early stage collections teams can do more with less, while maintaining great client experience.

Minimize call volume and inquiries by keeping customers informed on claims status with automated SMS notifications. Free up employees to handle more complicated inquiries with empathy.

#### Impact

- Minimize delinquency
   and default
- Recover more revenue
- Improve client experience
- Streamline the claims process and customer journey
- Increase customer satisfaction and loyalty
- Improve operational efficiency and productivity

### Use cases across industries.

Challenges

proactively.

Brands need to earn customer

trust by proactively informing

them about issues related to

their orders. However, more

than half of global customers

said necessary information

was not provided to them

Solution

Emails, texts, and phone calls are great channels to alert customers of what is currently going on and reassure them that the brand is taking necessary steps to rectify the issue.

Healthcare providers need to connect with patients about medical bills due. In addition, they need to proactively remind patients about events such as upcoming appointments.

The government manages business permits and registrations. Notifying and reminding companies when a license/permit will expire and renewal is required is often inefficient. Efficient outbound dialing enables more patient connections. Automated SMS notifications enable eventdriven communications for reminders and alerts.

Proactive outbound notifications enable government agencies to effectively and efficiently send personalized, timebound communication via phone or SMS, to businesses requiring a license or permit renewal.

#### Impact

- Prevent an inbound flux of inquiries related to an issue.
- Improve customer loyalty
   and satisfaction

- Support revenue cycle efficiency
- Reduce no-show rates
- Improve office productivity

- Reduce business licenses/ permits expiring before renewal
- Improve administrative efficiency
- Improve business sentiment toward the government

#### About Talkdesk
