Talkdesk Quality Management

Turn every interaction into an opportunity to elevate your CX.

With Talkdesk Quality Management™, it’s never been easier to efficiently evaluate agent interactions, identify key areas of improvement, and provide agents with the actionable feedback they need to deliver an exceptional customer experience.

Main capabilities

Evaluate effortlessly and provide actionable feedback.
Evaluate customer interactions based on synchronized voice and screen recordings, fill out scorecards and add time-stamped annotations for agents to review, all from a single intuitive user interface that helps you streamline the quality management process.

Improve coaching by uncovering root causes of poor performance.
Leverage quality management data and insights to both identify and act on the root causes of poor performance, helping you cultivate a team of high-performing agents that provide consistently better customer experiences.

Ensure fairness and objectivity.
Provide a fairer, more holistic assessment of each agent by making objectivity a fundamental part of the evaluation process. Random sampling, calibration and agent dispute capabilities help automate the evaluation process while making sure every agent is being scored fairly.

Boost efficiency with AI-enabled automation.
With Talkdesk QM Assist™ you can augment and streamline your quality management process using AI and speech analytics by leveraging searchable call transcripts, customer sentiment analysis, and end-to-end automated interaction scoring.
Key features

**Flexible forms**
Leverage pre-built or customizable forms to tailor components and questions to the specific needs of different queues, channels, and teams.

**Voice and screen recording**
Play agents' screen and audio recordings simultaneously for a complete picture of every customer interaction.

**Contextualized feedback**
Elevate your feedback with specific examples by adding time-stamped comments and reactions to interaction recordings.

**Calibration**
Assign one or more recordings to multiple evaluators and ensure all evaluators have a collective understanding of interaction success criteria.

**Random sampling**
Programmatically assign supervisors and quality analysts a random sample of customer interactions to evaluate.

**Seamless coaching experience**
A single, unified platform for WEM makes it easy to assign agents content to review and schedule time for coaching.

**Automated scoring**
Enable your evaluation forms to support automated AI-based call scoring, using a set of predefined criteria and keywords.

**Interaction transcripts**
Access call transcripts within the evaluation flow and search for keywords to further investigate issues or quickly jump to specific moments in the call.

**Sentiment analysis**
Get insight into the customer's emotional state throughout each interaction with algorithmic analysis of tone and phrasing.
